MEESHO

A Simple, Secure & Organized E-Commerce Platform that Empowers Nation's Market with Shop Ease

MODULE -2

WEEKLY PROJECT - 3

Product Vision & Mission

- **Vision:** “To create and endorse a simple, safe & hassle-free online shopping experience for the country’s population.”
- **Mission:** “To Enable a quick responsive, User Friendly Eco-System for Sellers and Buyers with Seamless Trading.”

Problem Statement

“When I access the Meesho app, I want to find the desired products intuitively, But I struggle Because of Unnecessary and vague filters leading to enragement and set down.”

Jobs-To-Be-Done(JTBD)

1. **For sellers:** “When I Upload my products to sell online, I want it to be visible and correctly categorized so that I feel delighted gaining optimum returns.”

2. **For Festive Shoppers:** “When I search for my desired product, I want a simple and structured filters with personalized discovery, so that I can purchase comfortably.”

User Research Plan

The following are the problems traced based on secondary research data:

- Discovery Fatigue.
- Support Gaps & Slow response.
- Lack of Trust.
- Low visibility & Unsustainable growth for sellers.
- Delivery delay & Irrelevent products.

Persona Creation – 1: The Seller

Name: Radha Rani
Bio: 32-year-old homemaker from Jaipur. Runs a small boutique from home, recently started selling on Meesho to reach more customers without opening a physical store.

Gains & Motivations:

- Wants to grow her income while managing family responsibilities.
- Appreciates zero-commission, low-barrier entry.
- Excited about reaching customers outside her city.

Pains & Frustrations:

- Finds it hard to get her products discovered without ads.
- Returns eat into her profits, especially during festive seasons.
- Support tickets take too long to resolve.

Quote:
"I just want my sarees to be seen and sold fairly, without losing any returns and delay."

Persona 2: The Festive Shopper

Name: Krishna
Bio: 27-year-old IT professional from Lucknow. Shops online mostly during festivals for clothes, gifts and home items. Price-sensitive but values quality and timely delivery.

Gains & Motivations:

- Wants affordable festive deals and wide variety.
- Loves the convenience of shopping from home.
- Seeks trendy styles at budget prices.

Pains & Frustrations:

- Overwhelmed by too many irrelevant options.
- Quality sometimes doesn’t match product images.
- Refunds and replacements take longer than expected.

Quote:
"I don’t mind buying budget products, but I want them to look like what I saw online and arrive before the festival."

Customer Journey Map

Customer journey map	Awareness	Consideration	Onboarding	Retention	Loyalty
User actions	Hears about deals on social media / friends	Browses app store reviews, seller ratings	Downloads app & signs up	Shops during sales, checks updates	Repeats orders, shares app
Touch points	Ads, referrals, WhatsApp groups	Reviews, YouTube, word of mouth	App install, signup page	Push notifications, offers	Discounts, referral rewards
Experience	Curious about low prices	Interested but cautious	Excited to explore but confused by clutter	Enjoys deals but faces discovery fatigue	Loyal if trust is built
Pain points	Skepticism about quality	Mixed reviews, fake listings fear	Overloaded interface, too many steps	Poor filters, delays in support	Low trust in product quality & sellers
Opportunities	Show transparent pricing & trust signals	Highlight seller ratings & authentic reviews	Simple & clear onboarding	Smarter filters, better customer support	Build trust through reliable delivery & rewards

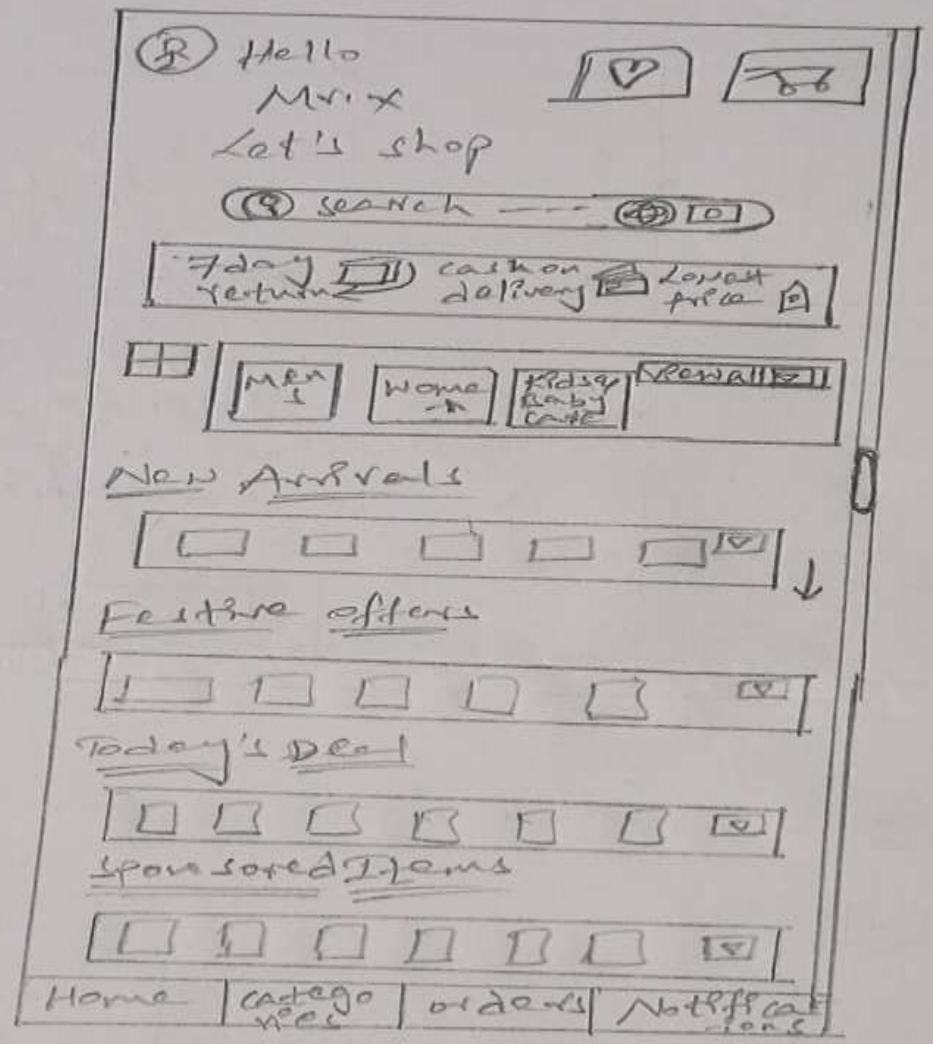
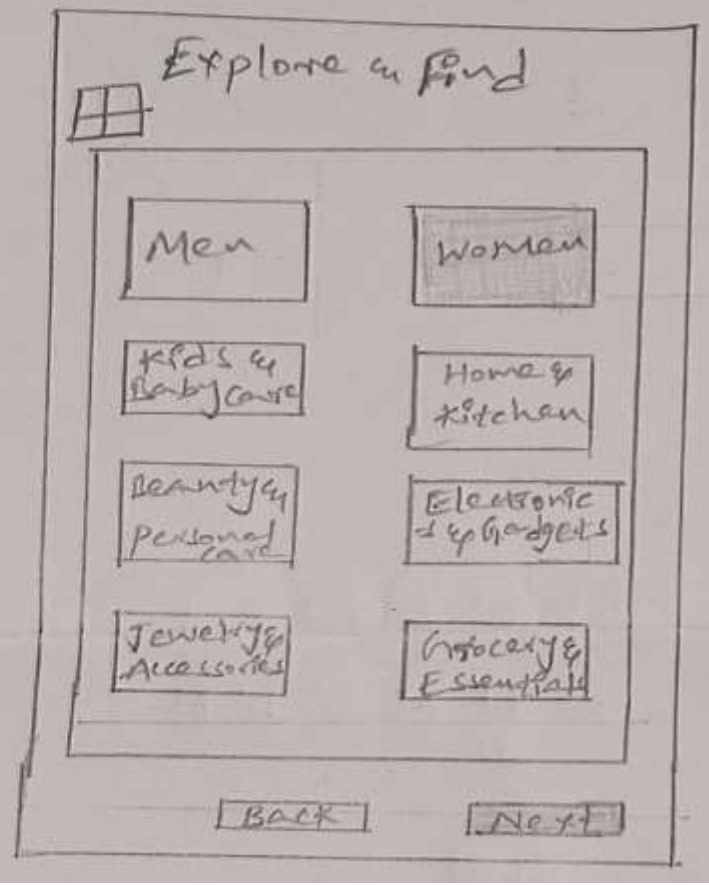
3) Home page / Dashboard :-



→ After clicking on 'View All' it shows the categories as shown below:



User Story & Acceptance Criteria

User Story:

For Festive Shopper – “As a festive shopper, I want personalized product recommendations so that I can quickly find relevant items for my celebrations without wasting time.”

For Seller – “As a seller, I want clear insights into my sales and returns so that I can improve my pricing and inventory decisions.”

Acceptance Criteria:

For Festive Shopper – “Given I am on a product detail page, When I scroll below the description, Then I should see a “Similar Festive Items” carousel.”

For Seller – “Given I list a new product, When I check its status, Then I should see whether it is approved, pending, or needs edits with clear instructions.”

Effort Estimation Using Story Points

The Story Points for the respective roles could be better assumed and determined as follows:

For Festive Shoppers:

- ‘Festive Picks for you’ in homepage section – 5
- Similar Festive items – 3

For Sellers:

- Sales Overview Dashboard – 8
- Product Listing Status updates - 3

Prioritization Framework

Based on Moscow Framework it can be described as:

- Personalized Recommendations – Must have.
- “Similar Festive Items” Carousel – Should have.
- Quick Filters – Must have.
- Gamified Festive Offers – Could have.
- AI Driven Suggestion Tool – Won’t have.

Minimum Viable Product(MVP)

The Optimum MVP Should be :

- Personalized Recommendations.
- Essential Filters.
- Sales Overview Dashboard.
- Product Listing Updates.
- Sponsored Items.

Road Map

The Following is the Goal Oriented Road Map to be traced out:

Goal 1 : Build Trust & Reduce Fatigue.

Goal 2 : Enhance Experience & Engagement.

Goal 3 : Increase Scale & Differentiate.

Usability Testing

The Usability testing helps to find out:

- Shoppers tested for Discovery ease.
- Sellers tested for Clarity & control.
- Visibility of Similar product with Recommendations & Suggestions.
- Respond with reason for Rejected listing.

Metrics should be:

- Task Completion Rate.
- Time Taken per Task.
- Customer Satisfaction.
- Error Rate.

AI Thinking

Recommended Products based on previous patterns could be best AI use case as of now because:

- Reduces Discovery Fatigue.
- Enables Customization.
- Drives Engagement and sales.
- A simple, Basic & Less expensive to implement when compared to computer colour themes & Behaviour pattern.
